According to the Underage Drinking Enforcement Training Center (www.udetc.org), underage drinking alone cost the citizens of the United States \$60.3 billion in 2005. These costs include medical care, work loss, and pain and suffering associated with the multiple problems resulting from the use of alcohol by youth¹. This translates into a cost of \$2,094 per year for each youth in the nation. Excluding pain and suffering from these costs, the direct costs of underage drinking incurred through medical care and loss of work costs the United States \$21.1 billion each year.
